

Mauro Bieg

Zürich, Switzerland

E-mail: mauro.bieg@gmail.com

Born: September 28, 1988 in West Berlin

Citizenship: Swiss

Summary

Computer Scientist (MSc ETH Zürich) with a “getting things done” attitude and experience working in multidisciplinary teams, big companies and startups. I enjoy finding solutions that are as simple as possible, but no simpler.

Employment

Since 2019: Technical team lead at [TX Group](#), Zürich, Switzerland

TX Group (formerly [Tamedia](#)) is the largest media group in Switzerland. As the technical team lead for the web front-ends of the subscription news titles, my team of nine developers is responsible for the platform delivering thirteen websites, including [tagesanzeiger.ch](#) and [derbund.ch](#). We handle a sustained load of 150'000 requests/min, with peaks exceeding 300'000.

2018-2019: Software engineer at [Fision Technologies](#), Zürich

Fision Technologies is a startup with at that time around 20 employees. The product is a mobile app and accompanying back-end. End-users use the app to take photos of their body, from which a 3D-model is constructed, which is used to give size-recommendations for clothes when online-shopping on one of our customers' online stores.

I was part of the seven-people platform-team, that was tasked with continuously delivering the software into production. I was working on both the front-end (React, TypeScript, GraphQL) and the back-end services. The latter were implemented using Python (Falcon and SQLAlchemy), exposed as REST APIs and ran on Google's Kubernetes Engine.

2015-2018: Co-founder and full-stack developer of [2324.ch](#), Zürich

My co-founder (a graphic designer) and I won an Impact Hub Zürich Fellowship with the idea of 2324.ch – a participatory hyper-local online news-platform. We quickly on-boarded a marketing/sales guy and soon acquired four paying municipalities. Unfortunately, that was not enough to sustain our growth vision, so we decided to hand-over the project and our customers to Crossiety, a startup sharing our vision of an online village square.

In addition to forming our team and product strategy, I implemented both front- and back-end of the online platform. My decision to go with a simple and proven stack (Ruby on Rails, PostgreSQL and some React) served us well, and allowed us to quickly iterate on the product.

2017-2018: Haskell developer for [qua-kit](#), Chair of Information Architecture, ETH Zürich

In my part-time work, I supported Artem Chirkin, then a PhD student, in continuing the development of [qua-kit](#), a web-based platform that assists urban designers in their design process.

I worked on both the front- and back-end, which were implemented using [Reflex](#) (a functional reactive programming framework on GHCJS) and [Yesod](#) respectively.

Previous jobs

2015: Software engineer at [mp technology](#), Zürich

2014: Internship at [Silk](#), Amsterdam, The Netherlands

2011-2014: Webmaster of the Departement of Computer Science at ETH Zürich

2012: Summer internship at [28msec](#), Palo Alto, California, USA

Education

2013-2014: Master of Computer Science at ETH Zürich

2008-2013: Bachelor of Computer Science at ETH Zürich

2005-2006: Exchange year in Norway (high school in Kristiansund)

2003-2008: High school: Kantonsschule Romanshorn, Switzerland

1995-2003: Basic education in Horn, Switzerland

Select Projects

Since 2014: [regular contributor](#) to [pandoc](#), a universal document converter – Haskell

2019: [PanWriter](#), a Markdown editor with pandoc integration – PureScript, JS, Electron

2018: LED matrix display for Impact Hub Zürich – Python on Raspberry Pi

2014: [Master thesis](#): a GUI tool to map any JSON-based Web API, plus a Node.js-based server to access it as if it were a HAL Hypermedia API

Know-how

Open source: [github.com/mb21](#) and active on [stackoverflow.com/users/214446](#) (>29k rep)

Good knowledge of version control workflows (using Git) and macOS/Linux utilities

Programming languages:

extensive experience: TypeScript/JavaScript, Haskell, Python, Ruby, HTML/CSS, SQL

some experience: Rust, Java, PureScript, PHP, C/C++

Writing: [mb21.github.io/blog](#), articles for the [Free Software Magazine](#)

Talks: [Pandoc at HaskellerZ](#)

Languages

German: native language

English: Cambridge Certificate in Advanced English Grade A

Norwegian, Swedish: fluent

French: basic knowledge
